

NFC Tag (NTAG215) 504 Bytes, 13.56 mHz, diameter 2,5 cm, self-adhesive sticker

NFC White Tags with NTAG 215 Circuit by NXP, 504 Bytes Memory, 25 mm Round Tag with Strong Self Adhesive, Same Chip with Tagmo

All tags are pre-formatted, can store 504 bytes of user memory, serial number (7-byte UID), can be protected by a 32-bit password, rewriteable multiple times and can be locked.

Compatible with all NFC Smartphones (iPhones read-only mode, regardless of the NFC tag). These tags are not designed for use on metal surfaces

Technical Description

Functionality & Operation

Frequency	13.56 MHz
RFID transponder protocols	NFC (NDEF), ISO 14443A, NTAG215
Data memory	504 byte
Write cycles	100000

Mechanical

Dimensions	Width: 25mm, Height: 25mm Length: 0.01mm
Color	white
