

UHF RFID Flexible Tag, self-adhesive, in silicon case

RFID tag for European UHF frequency designed for a specific purpose. In our offer you will find RFID tags suitable for carrying on the body, for attaching directly to a metal surface, resistant to high temperatures or weather conditions, etc.

The different types of RFID tags are available to see, test and discuss at our business address. If the product isn't available in our stock, it can be ordered from a minimum of 10 pieces.
