

Hands-free KIT for CipherLab RS35

Kit for using the durable PDA CipherLab RS35 for hands-free operation. The set consists of a protective bag for RS35 with a rear hanging clip, fingerless glove and a trigger button for barcodes scanning.

This kit allows you to wear the CipherLab RS35 PDA on your wrist and to scan easily and quickly at any time, while keeping your hands free.

It is composed of the following items :

- a protective cover made of high wear-resistant synthetic material, with a quick fastening clip on the no-finger glove;
- a terminal (in the cover) holding no-finger glove on the left wrist, with fixing clip;
- a trigger button for activating barcode scans.
