RS51: Standard warranty extension to 3 years

CipherLab specifically constructed service program for mobile devices, to minimize downtime and reduce total cost of ownership for CipherLab's devices. Be prepared for the possibilities of needing repairs and keep your business running smoothly by secure protection of your investments!

CODEWARE as an CipherLab authorized service center offers not only standard warranty and post-warranty repairs of products of that brand, but also an extended service program for mobile terminals. Intention of that program is to prevent critical situations caused by unexpected failure of the equipment, which many internal processes may depend on.
