

## Scanner of an Anroid mobile computer setup

Setting parameters for reading barcodes and/or 2D codes for a mobile computer running the Android operating system

The offered service package includes:

- setting parameters for reading barcodes
- suffix & prefix settings
- other settings according to the customer's wishes
- creation of a configuration file, procedure, or setup card, if the device allows that

We provide the service remotely via internet or at the customer's workplace (with a surcharge for a service trip).
