ZEBRA
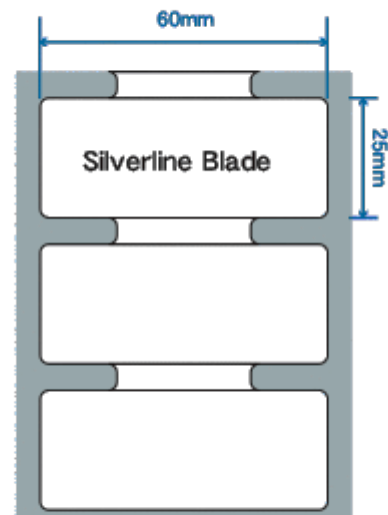

RFID Silverline label blade, 60mm x 25mm, PET, 500 et/kot

This small but powerful RFID label that can, in many cases, replace a hard RFID tag. Optimal for asset tagging, this little giant is sure to find a million industrial uses, works on just about any surface material you slap it on. At the heart of Confidex Silverline Blade™ label there is a cutting edge Impinj Monza R6 RF chip. Combined with our thorough understanding of materials, UHF and production techniques it helps make Blade the best on-metal RFID label choice.

The Confidex Silverline family is designed and verified to work with the Zebra ZT410 RFID Silverline printer. Other Zebra printers are not recommended or supported.
