

ZC300 - Card Printer, Dual Sided, 300 DPI, USB, Ethernet, display

The ZC300 card printer delivers ground-breaking simplicity, security and connectivity options in the slimmest fit-everywhere design in this printer class. Its elegant engineering eliminates virtually all pain points typically associated with card printing, making it easier than ever to print identity, access or membership cards, or credit and debit cards. The result is push-button simplicity, regardless of whether you are printing single or dual-sided cards in color or in black and white.

The ZC300 offers highly-intuitive well-tested icons, animations and text-based messages in your own language, allowing any user to easily understand what the printer needs and how to perform virtually any function — including how to clear a printer jam, fix a ribbon, load a ribbon or cards and more.

Monochrome print speed: 900 cards / hour
Max. single-sided color printing speed: 200 cards / hour
Max. dual-sided color printing speed: 140 cards / hour
Card dispenser capacity: 100 cards
Card holder capacity: 100 cards

Technical Description

Functionality & Operation

Communication interface	Ethernet, USB
Print mode	Dye Sublimation, thermal-transfer
Print resolution	300dpi
Memory	2GB flash memory
Display type	Graphical color LCD

Electrical

Power Source	90-132VAC, 190-264VAC RMS
--------------	---------------------------

Mechanical

Dimensions	Width: 157mm, Height: 258mm Length: 468mm
Weight	4.4kg

Consumables

Media type	Magnetic Stripe Cards, ID Cards, plastic cards
------------	--

Environment

Operating temperature	15 to 35°C
Storage temperature	5 to 70°C
Operating humidity (non-condensing)	20 to 80%
